

emspoma by JUZZA

company

In 1997 the Czech Company Jutta s.r.o. (Limited) purchased all the rights for the production and sale of all the massage products known as EMSPOMA and SPOR-TOVKA. The rights were bought from the Company TECHNIA SPORT a.s. (joint-stock company) which had originally invented these products in 1965.

Since 1997 we have modernized the methods of production, increased our turnover, and we have improved the designs of both the containers and labels.

According to a survey we know that our products have continued to be popular in the inland market. And they have been favoured equally by both the final consumers and sport clubs and rehabilitative houses.

Currently we export our products to the Slovak Republic, Slovinsk, Finnland, Germany, Hungary, the Ukraine and the USA. Our massage products were used in all the Olympic Games, World Championships, and European Championships. This is an indication that our high quality is internationally recognized and appreciated.

business

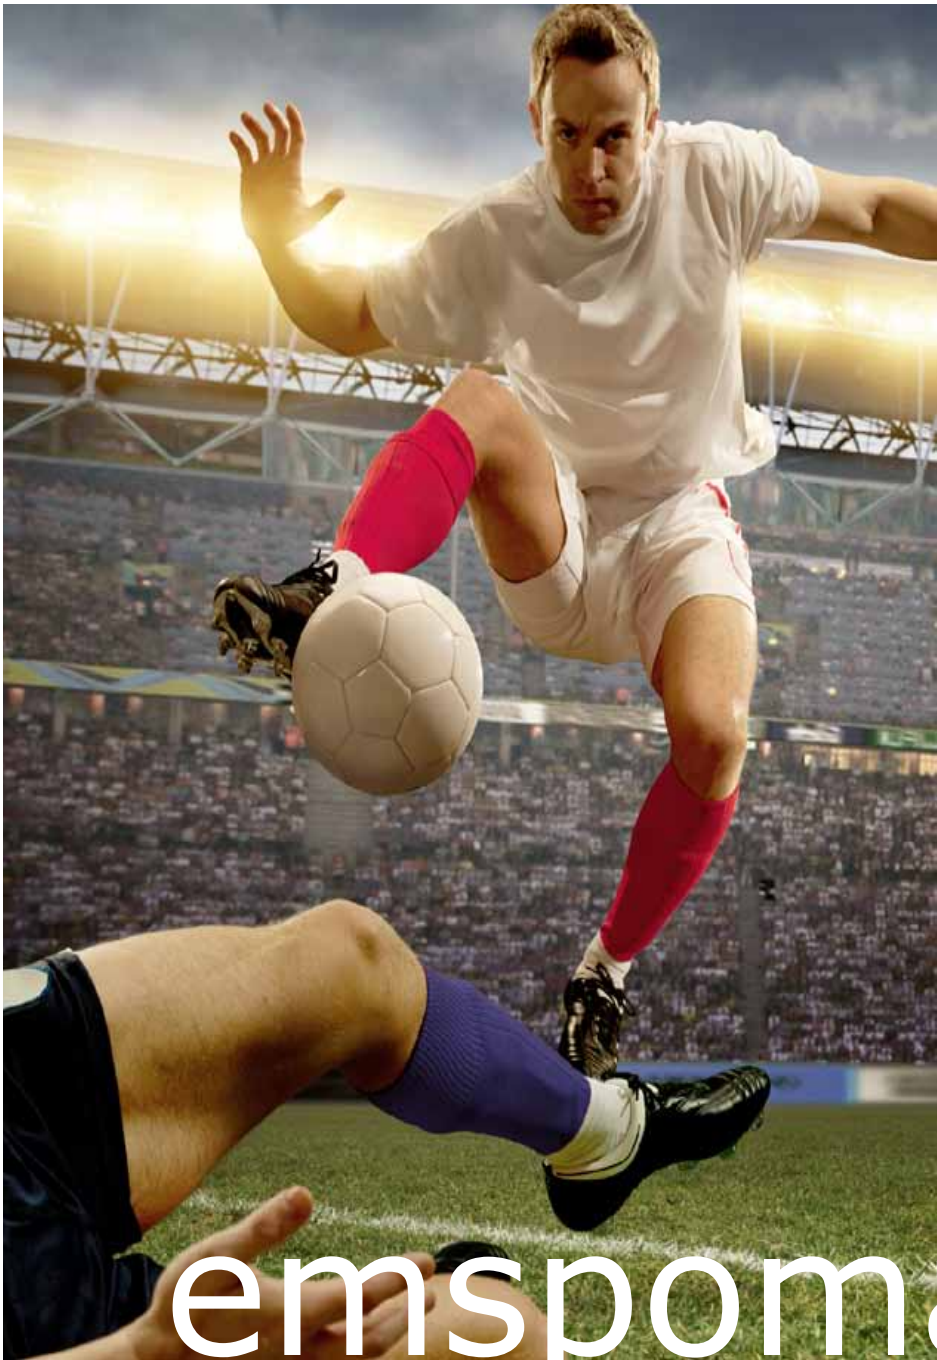

We regularly take part in the Fairs: Sport Life Brno, Sport PRAQUE and the International Fair ISPO Munchen. Here we present the complete scale of our products to business partners, lay and professional persons.

We are Constantly addressing new and existing customers by means of advertisements that are situated in sports magazines, daily newspapers, in attractive leaflets, in radio spots and by sponsoring many sporting events: (Wellness Marathon, 3D Fitness Meeting, Ustecký ½ Marathon, Zumba Marathon ... etc.).

Our aim is to meet requirements of all our customers, and at the same time maintain close contact with them to continue to offer our massage products that are of the highest level of quality.

emspom

Special massage emulsion against pain and fatigue

Designed for massages and self-massages to eliminate pain and fatigue of the body and muscles.

Contains active substances eliminating painful conditions of excessive or uneven load of the locomotive system. Do not use on the face; protect your eyes! Dermatologically tested.

Effect on the skin: Neutral pH value

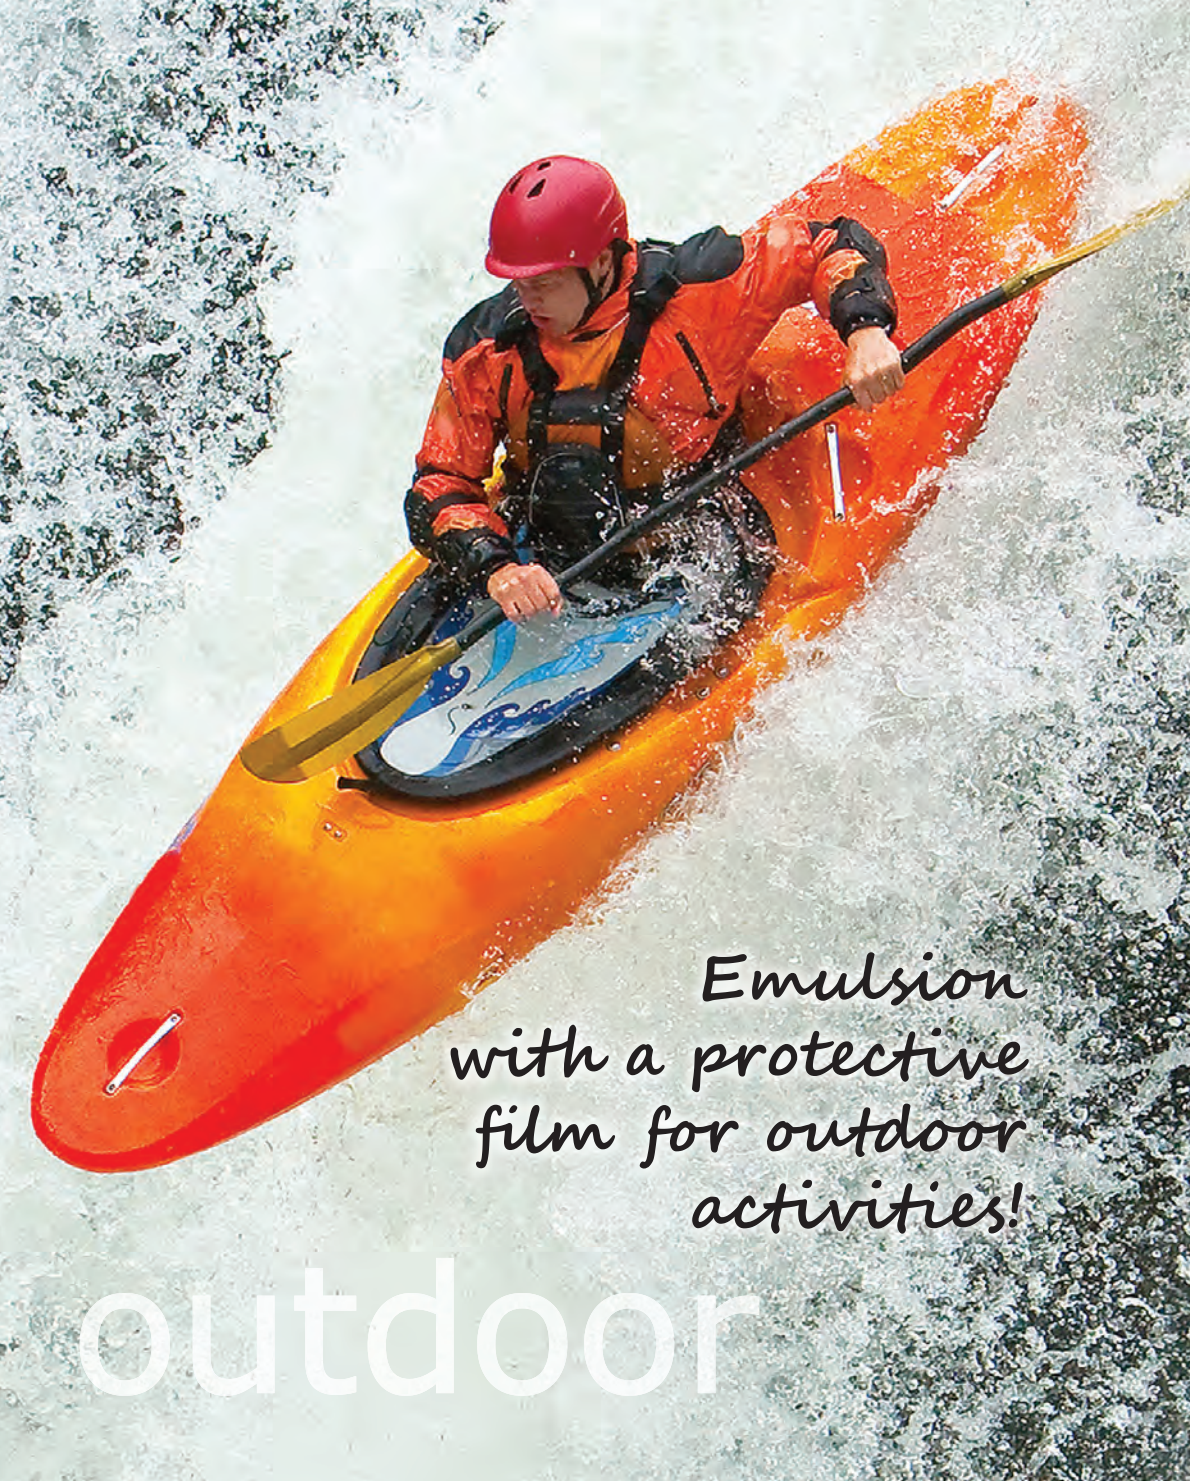

Special warming massage emulsion

Designed for massages and self-massages when it is necessary to warm up a part of the body and feel the heat with a long-term effect. Used also as a preventive massage against muscle spasms and coordination failures.

Do not use on the face; protect your eyes! Dermatologically tested.

Effect on the skin: Neutral pH value

outdoor

Special massage emulsion „S” OUTDOOR

The range of time-proven EMSPOMA massage products now features another special product - EMSPOMA special „S” OUTDOOR.

Emspoma Outdoor is suitable for cold, wet and rainy weather for cycling, football, running, climbing, hiking, rowing, water sports, diving, etc. at low water and air temperatures.

Compared with conventional Emspoma products it has clear hydrophobic (water repellent) properties. After application (massage, self-massage) this emulsion creates a film on the skin, which prevents the skin from getting cold.

This emulsion is designed for both massages as well as for spotting prior to massage only in cases when we want to protect the skin from the adverse effects of weather influences (especially cold and water or exposure to wet and cold weather).

SPORTOVKA

SPORTOVKA is a modern massage and restorative product intended for short massages and self-massages for athletes and regular consumers.

The balanced content of ethanol, glycerin, flavouring compositions, functional materials and water help to achieve optimum skin condition and increase resistance to microbiological agents.

SPORTOVKA A basic

Intended primarily for short massage and self-massage, to purify and regenerate the skin all over the body and face.

SPORTOVKA B warming

Has a mild strengthening and warming effect. Its application is a preventative massage against muscle spasms and coordination failures.

Not recommended for use on the face.

SPORTOVKA C cooling

Significant refreshing and cooling effect. Application is recommended for additional massages and self-massages to eliminate fatigue.

Not recommended for use on the face.

SPORTOVKA E eucalyptus

Has an anti-pain and anti-fatigue effect. Intended for short-term massage and self-massage to eliminate muscle pain and load of the musculoskeletal system.

Betul

Rekongem is a massage product intended for rehabilitation, restorative and cosmetic massages and self-massages.

Rekongem is a massage body lotion with a high massage slip with a minimal amount of fat phase and excellent dermatological properties with long-term effects.

Its new formulation significantly **increases skin hydration** and **leaves the skin soft and supple**. Herbal extracts, active ingredients and perfume compositions take over the role of the smoothing lotion.

of orange skin?*

Rekongem Capsica special

A highly effective massage milk that promotes blood circulation. At the point of application (massage) it heats up, stimulating the metabolism and promoting fat reduction and removal of excess water from tissue.

Contains active chili fruit extracts (Capsaicin) and methyl salicylate that improve joint mobility, relieve muscle spasms and stiffness. Helps shape the body, reduce weight and cellulite.

Five-time World Champion in fitness Frantisek Bartos said about Emspoma: „While doing a physically demanding sport like fitness, I don't underestimate body care. That's why I use Emspoma emulsions for pre-sport massages and regenerative massages. I combine them depending on the circumstances, but my favourite one is green - against fatigue and pain.”

Our products are used by many sports clubs in the Czech Republic, as well as wellness and fitness centres in addition to famous Czech spas.
